FOR IMMEDIATE RELEASE

THE NEW EXPERIENCE: EDIBLE SOFTWARE

Houston, TX – [October 15, 2015] – After 35 years of exceptional service, Edible Software will launch its complete corporate re-imaging at PMA Fresh Summit on October 24-25, 2015 at booth 2135. Edible Software is excited to present the completion of its new website, logo, and added features at the show (www.ediblesoftware.com).

Inside Booth 2135

Trevor Morris, the CEO and Charles Butler, the VP will present the complete corporate re-imaging of Edible Software. Those that stop by the booth will enjoy the new, fresh experience, Edible Software offers. With the new website and many other benefits, Edible Software guarantees success.

Charles Butler, Executive VP of Sales and marketing at Edible Software, commented on the launching of Edible Software's complete corporate re-imaging, saying that: "We are excited to introduce the completion of our corporate re-imaging at PMA. We cannot wait to present our new website, logo and all of the new features we have added to the software to meet the needs of wholesale food distributors. Do not hesitate to stop by booth 2135, you are in for a treat!"

About PMA Fresh Summit Expo

With more than 20,000 people participating, Fresh Summit can help you anticipate change, identify emerging trends and profit from new opportunities. Participating in Fresh Summit gives you a distinct advantage. Fresh Summit has something for every segment of the produce and floral supply chain, including retailers, industry suppliers, wholesalers, growers and importers/exporters.

About Edible Software

Edible Software is the premier provider of inventory control, traceability, and full accounting systems software. We are proud of the accuracy and reliability of our software including the many benefits that have been provided to our clients and their customers. We cherish the close relationships that have been built with our clients and the care that our staff displays towards each of them. Our goal is to be the best wholesale food distribution software company, in terms of service, support, and product quality.
